

# **GROWING OLIVES IN TEXAS**

**A project envisioned by growers of Texas**

**A Presentation Specially Prepared for**

**Olive Oil Council of Texas**

**Texas Olive Ranch**

**by**

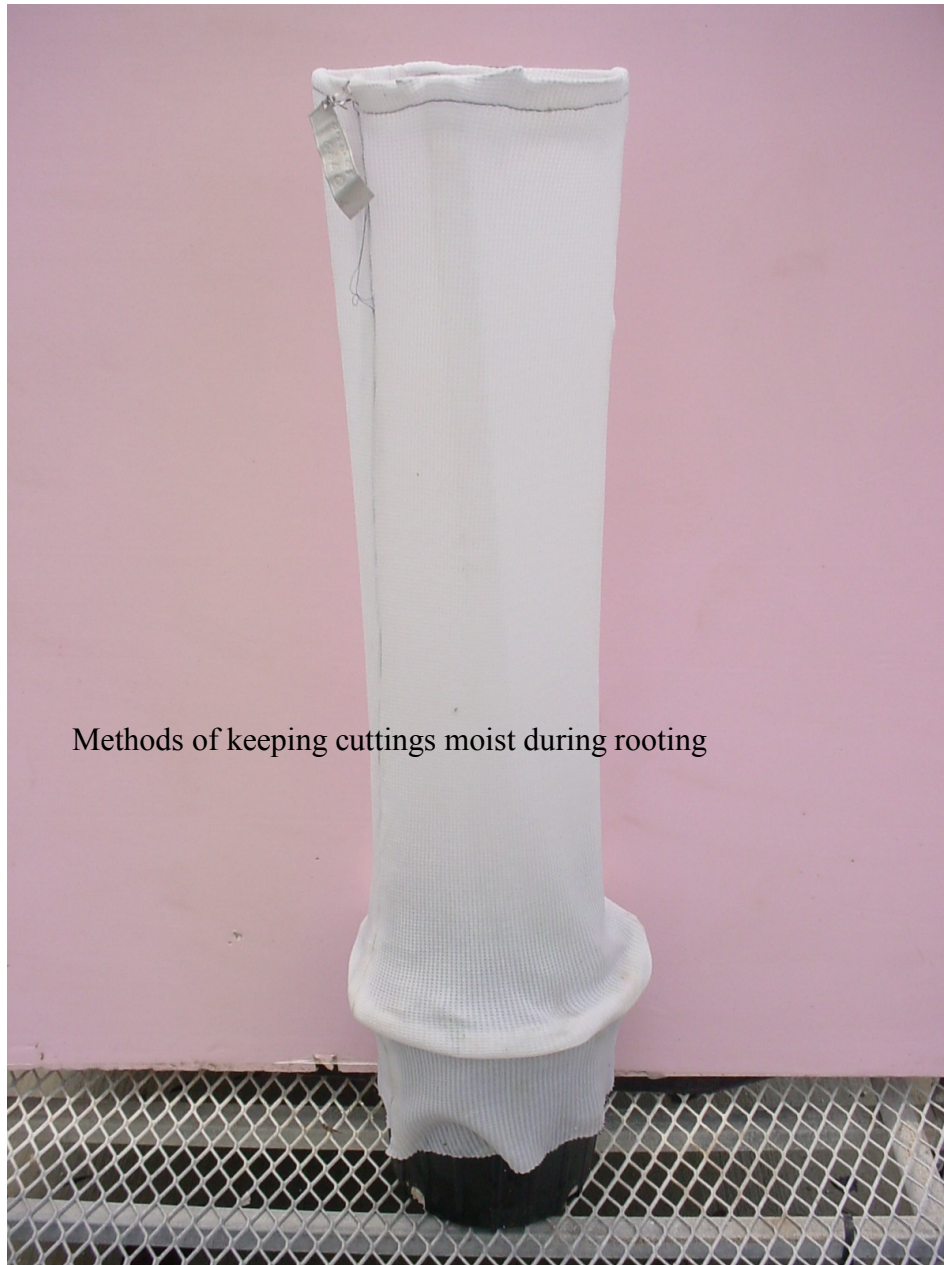

**Nasir S. A. Malik (Plant Physiologist)**

**Kika de la Garza Subtropical Research Center, Weslaco, Texas**

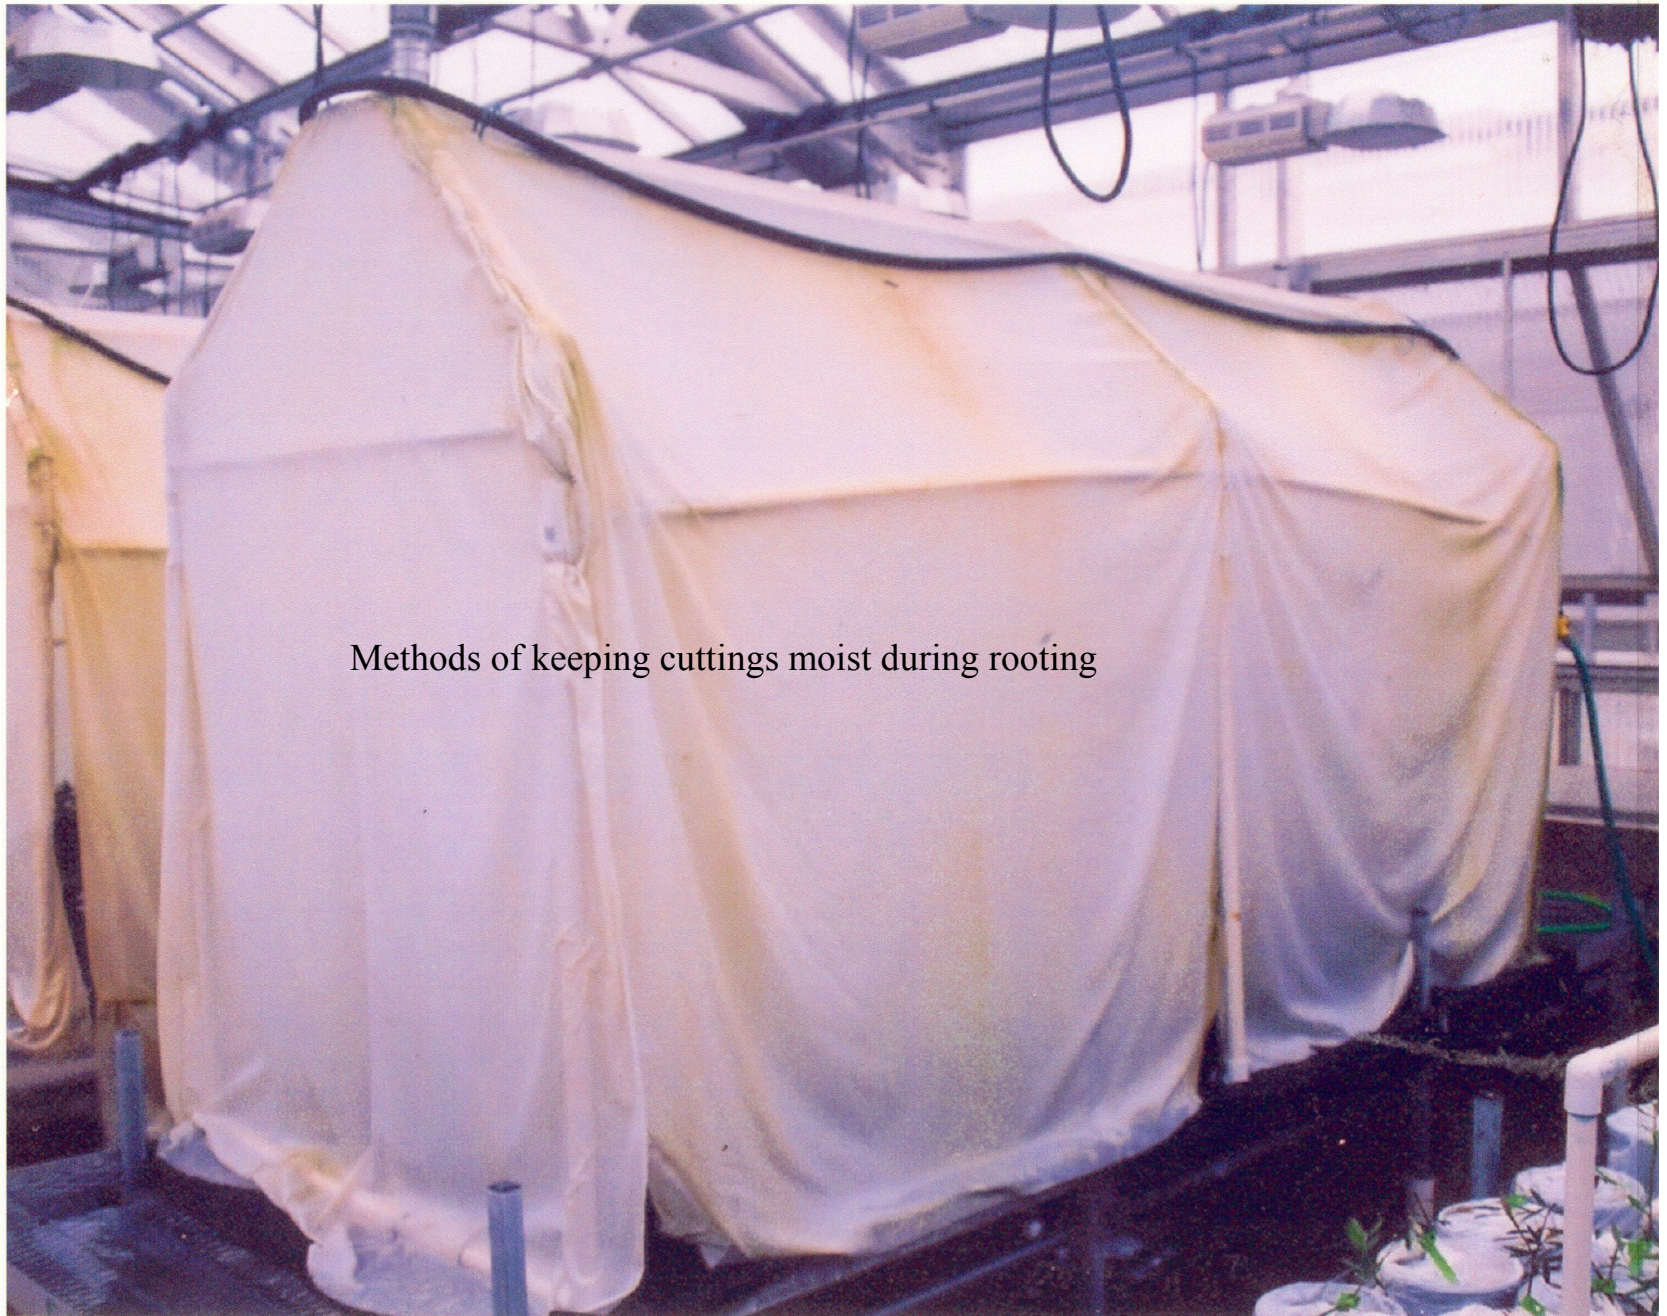

The following slides show early experimental methods for the propagation of olive trees

Experimental methods of  
root cuttings

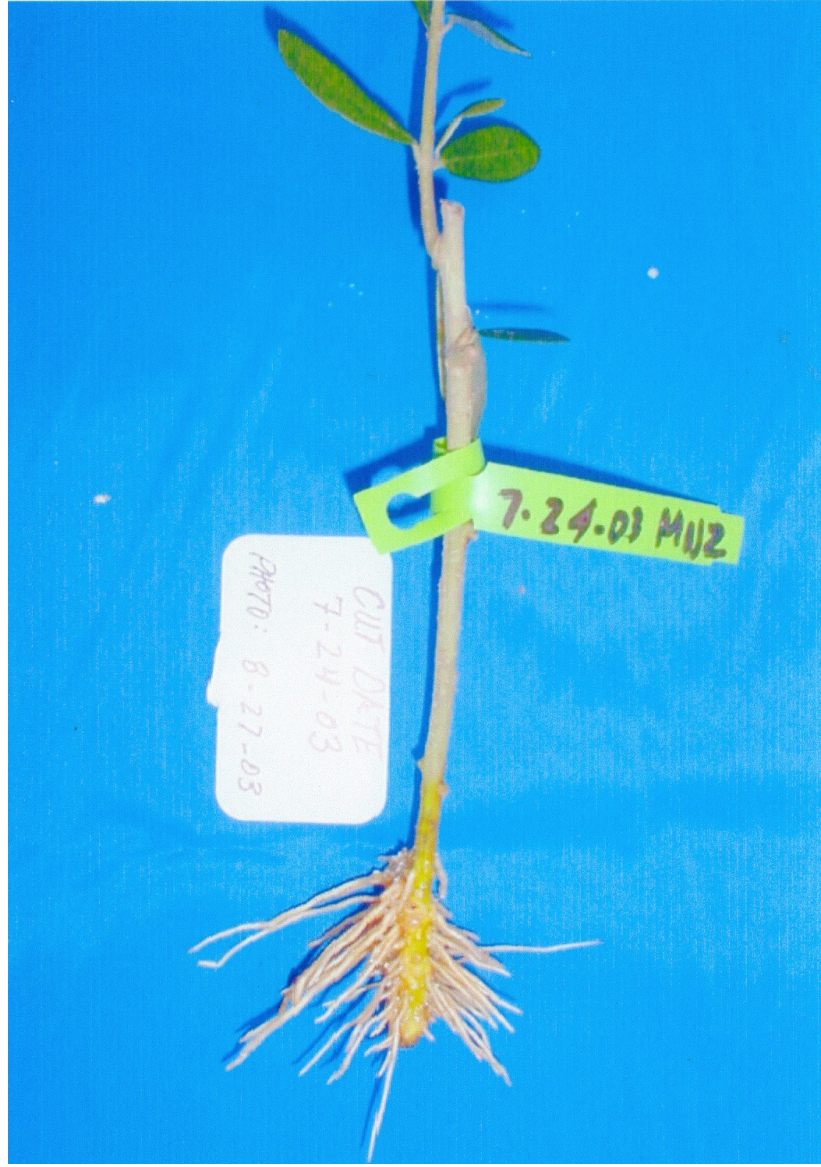

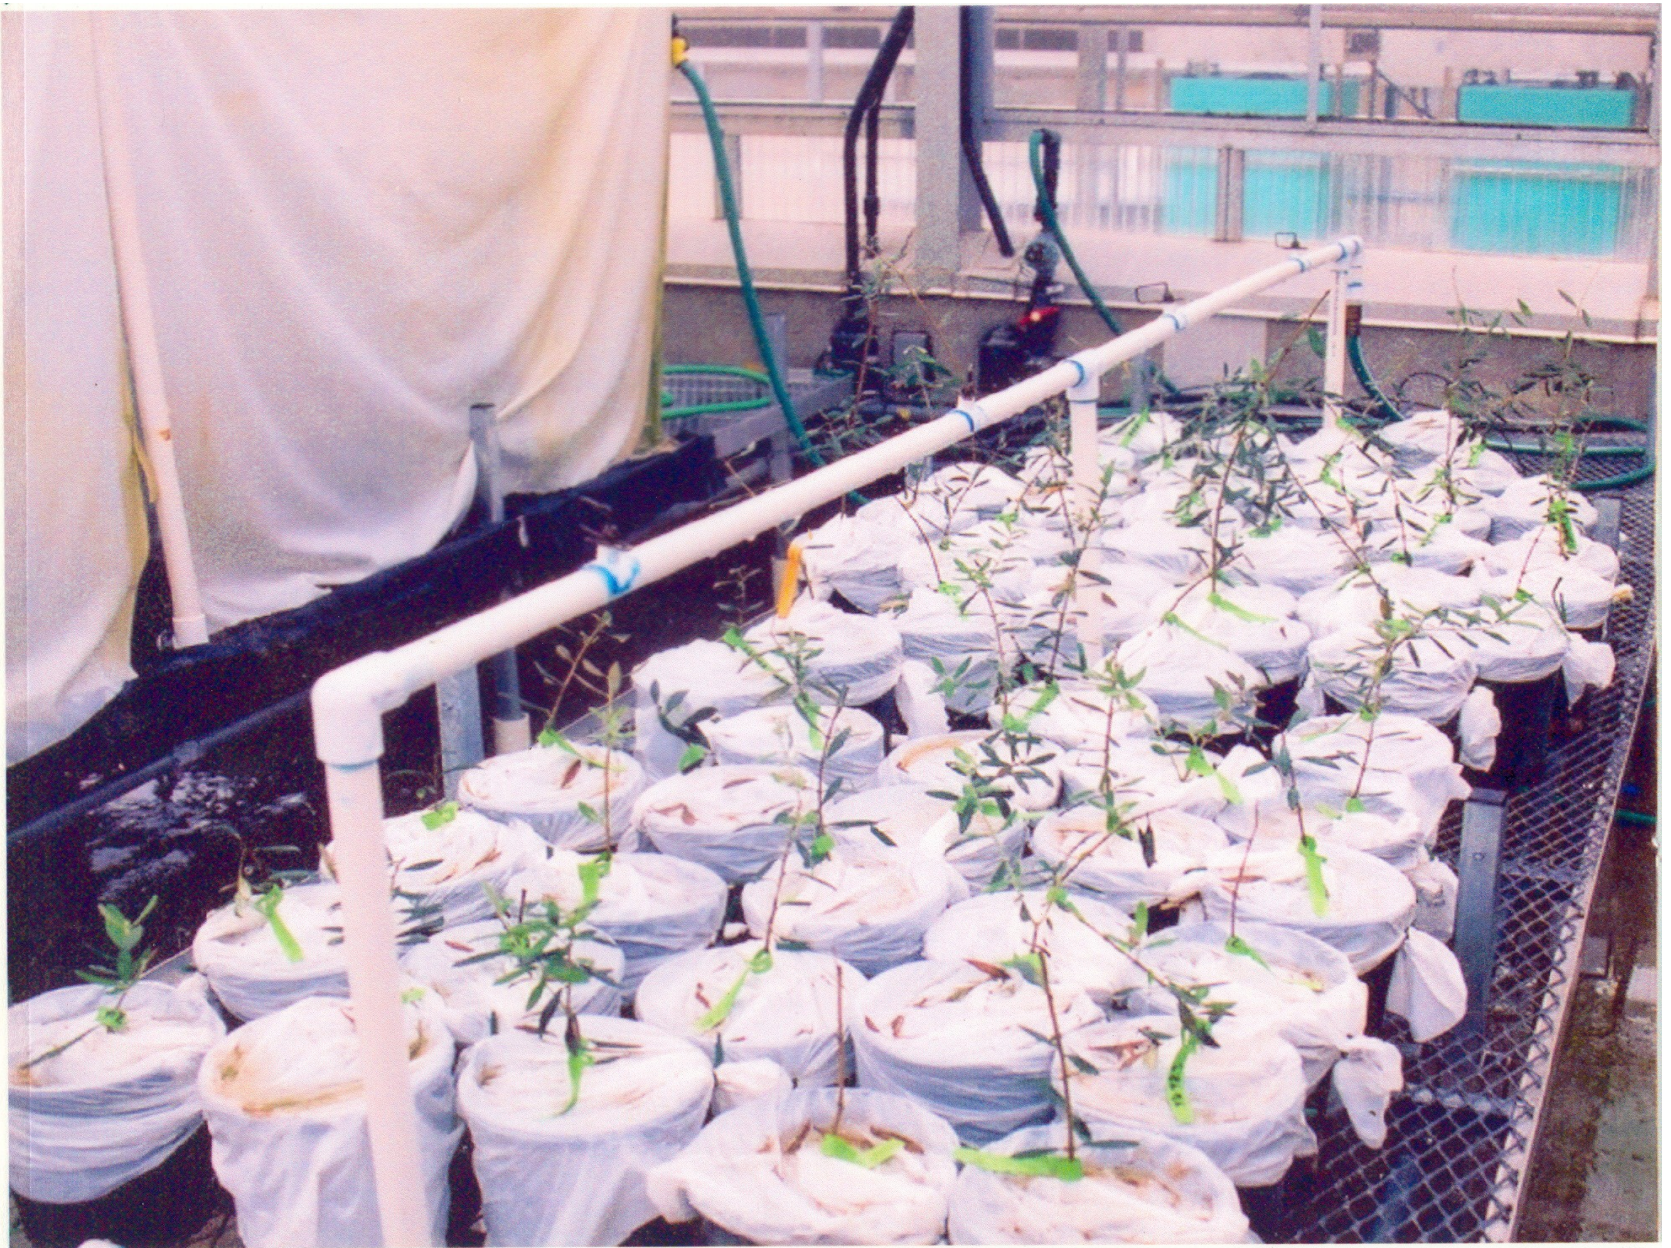

Methods of keeping cuttings moist during rooting

Methods of keeping cuttings moist during rooting

**Rooted cuttings are sprinkled with water until new shoots develop**

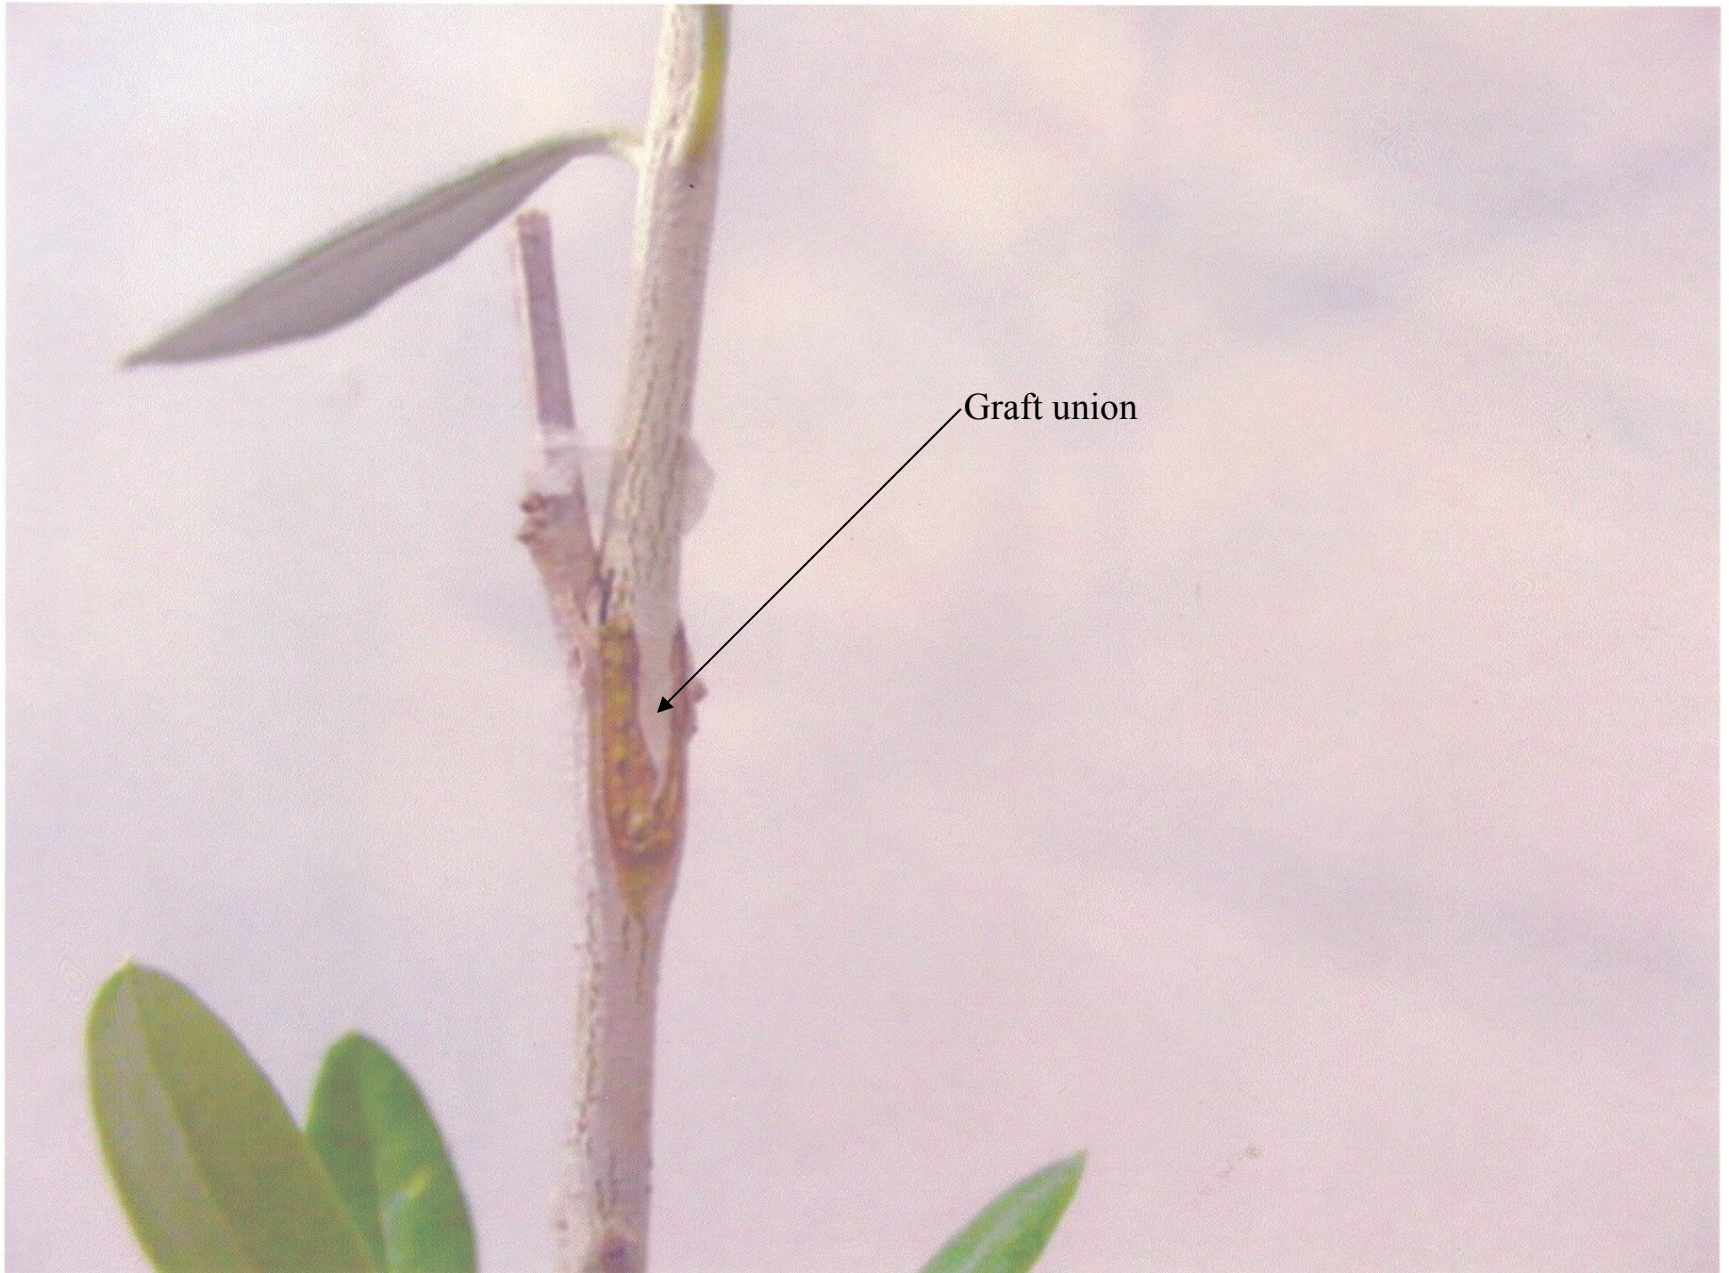

New shoots formed on  
rooted cuttings

Young scion grafted  
on rootstock

New grafts are kept moist and under shade

Graft  
developed  
into shoot

**We are making progress, but much  
more remains to be done**
